Remember, you can check your estimated benefit amount online!

You don't have to wait until retirement to find out how much can collect in benefits. In fact, you can check your statements online at any time -- even if you're years away from retirement -- to see your estimated future benefit amount. To check your statements, you'll need to create a MySocialSecurity account online. In the past, the Social Security Administration mailed statements to workers each year, but most people no longer receive paper statements. So for millions of Americans, the only way to check your benefit amount is to create an online Social Security account.
